

Course ID: EAW-ELENN	ELECTRICAL AWARENESS - NON ELECTRICAL WORKERS
COURSE OVERVIEW	This course was developed specifically for <i>process operators and operating technicians</i> who operate the electrical equipment. It aligns with the requirements of CSA Z462, providing an awareness level understanding of occupational electrical hazards and the safe work procedures used to reduce the risk of those hazards. It covers hazard identification of electrical shock and arc-flash, switching technique, resetting of breakers, and PPE testing.
