CONFINED SPACE ENTRY & ATTENDANT AWARENESS

COURSE OVERVIEW

The Confined Space Entry & Attendant course is an awareness-level training program designed to be supplemented by site-specific information and training defined by the employer. The goal of this program is to provide participants with the general knowledge necessary to work safely in and around confined spaces.

Participants will learn about the regulatory requirements under Ontario Regulation 632/05, including the legal responsibilities of the employer and constructor, the entrant, the attendant, and the rescue team. As well, participants will learn about confined spaces hazards and the various measures used to control them.

The program follows the *Ontario Regulation 632/05 – Confined Spaces* under the *Occupational Health and Safety Act*.

PROGRAM CONTENT

- Definitions
- Identifying confined spaces
- Purpose of a confined space program and plan
- Confined space assessment of atmospheric, biological, and physical hazards, as well as other hazardous conditions
- Application of confined space documents in the workplace: assessment, coordination of work, permit, and rescue plan
- Roles and responsibilities of the employer, supervisor, entrant, and rescue team
- Roles and responsibilities of the confined space attendant

TARGET AUDIENCE

Persons who may enter into confined spaces; or who may fulfill the responsibilities of the confined space attendant; or who manage workers going into or attending confined spaces.
