Z662 Oil and Gas Pipeline Basics

An introduction to the requirements of the CSA Z662 Oil and Gas Pipeline Systems

One Day Seminar

Seminar Overview
This one day seminar is essential for anyone involved in pipeline industry. Whether your responsibilities entail operations, maintenance, design, construction, QC or inspection, this 1 day seminar provides a comprehensive knowledge base for the scope, definitions and application of CSA Z662-15 principals. Focusing on the general requirements of oil and gas pipelines with a review of the CSA Z662-15 - Oil and Gas Pipeline Systems, this training program covers all relevant clauses and the Ontario and NEB regulations. This course provides the necessary background to enable participants to continue with more targeted training.

Learning Objectives
This one day course provides participants with an overview of the CSA Z662 Oil and Gas Systems. Upon completion participants will:
- Understand the practical application to pipeline design, construction and operation.
- Understand the structure, intent and content of the CSA Z662.
- Understand CSA Z662 Oil and Gas Pipeline Systems Standard General Requirements.
- Understand the context of all relevant clauses.

Agenda
Doors open at 7:30 and a continental breakfast is offered. Training is from 8:00 to 4:30 and includes 2 coffee breaks. Lunch is provided. The course will address the following:
- Introduction to Z662-15
- Review of Regulatory requirements
- Management Systems – concepts and major changes
- Design and Materials
- Construction, Inspection and Testing
- Operations and Integrity requirements
- Supplementary clauses 11 to 17
